HOW DOES IT WORK?

HA3 TRIPLE HYALURONIC ACID

3 different sizes of HA molecules that work on different levels to boost moisture and hydrate and plump skin

1

Plumping Enhancing Mini HA: “micro-molecular weight” strands that can penetrate deep within skin’s surface to boost and balance skin’s moisture levels, keeping skin better hydrated and more elastic and flexible over time.

2

Volume Boosting Micro HA: “mid-molecular weight” that can sink into skin, just below skin’s outer layer — exactly the right place for their immediate volumizing effect.

3

Smoothing Hydration Macro HA: “macro-molecular weight” filaments of HA that remain on the upper levels where they help hydrate skin and smooth the look of fine, dry lines.

HOW DOES IT WORK? VITAMIN C
