

ARTISTRY™

## Artistry Omega Drops Frequently Asked Questions

---

### 1. Can it be used around the eyes?

Yes, but please limit application to crow's feet (outer eye corners) and along expression lines. Avoid direct contact with the eye area.

### 2. Can people with oily skin use Omega Drops?

Yes. Omegas are key components of the lipid matrix in the skin's outer layer, helping to maintain hydration and reinforce the natural protective barrier. When skin lacks water, it may overproduce oil to prevent further moisture loss. By restoring the barrier and reducing water loss, Omega Drops can help balance oil levels and manage oily skin problems.

### 3. Can this product be used during the summer months, and does it affect SPF efficacy?

Yes. Omega Drops can be used in summer and do not affect SPF efficacy. However, do not mix the drops directly into SPF, as this can alter its protective properties. Apply SPF as the final step in your skincare routine.

## 4. ORDER of USE

Artistry Omega Drops is a lightweight oil that quickly absorbs into the skin's lipid layer. Heavier creams applied afterwards remain on the surface, forming a seal that locks in moisture.
