

NUTRILITE™ COMPLEMENTARY MEDICINES

COMPLIANCE – COMPETITIVE **ADVANTAGE**
FOR BETTER **BUSINESS**

ENHANCED BY SCIENCE

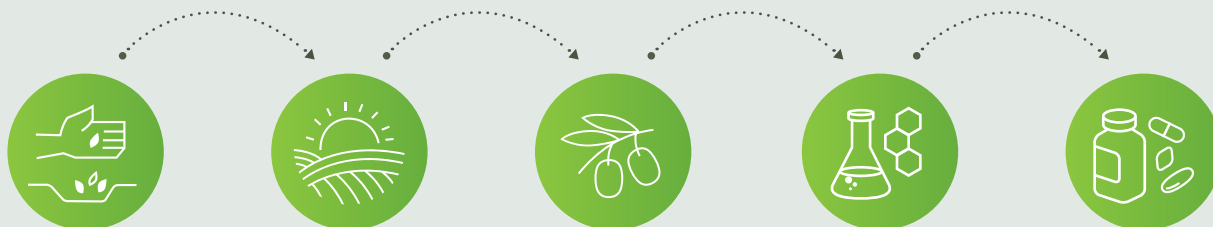

NUTRILITE™ scientists are constantly researching new ways to elevate natural ingredients by combining essential vitamins and minerals with plant-based phytonutrients.

Nutriline products help people all around the world to address general, everyday nutrient needs, as well as specific issues caused by lifestyle and dietary habits and circumstances. Quality-assurance experts ensure each supplement meets precise specifications for safety, purity, and identity. **These experts conduct more than 500,000 checks every year – that's the equivalent of one quality check per minute for every day of the year.**

WE CONTROL EVERY STEP FROM SEED TO SUPPLEMENT

From the seed that goes into the ground and the soil it grows in, to the finished product, every NUTRILITE™ supplement has a story – and we write every chapter.

SEED

It starts with specially selected seeds planted in the right soil and at the right depth.

SUSTAINABLE FARMS

We follow sustainable farming practices, allowing our plants to create more phytonutrients.

HARVEST

We harvest and process plants at their peak, using whichever parts (seeds, skin, or even the whole plant) have the best phytonutrient profile.

FORMULATE

Our scientists are constantly researching new ways to elevate our natural ingredients by combining essential vitamins and minerals with plant-based phytonutrients.

SUPPLEMENT

Every supplement undergoes numerous quality checks to ensure its safety, purity, and identity before it's bottled and shipped.

NUTRILITE™ - WHERE NATURE MEETS SCIENCE IN PERFECT HARMONY

HOW IT ALL BEGAN

While living in China in the early 20th century, Carl F. Rehnborg observed the benefits of a plant-based diet.

In the cities, people had poorer access to fresh fruit and vegetables and they generally appeared to be suffering from inferior nutritional health. By contrast, in the countryside, where fresh fruit and vegetables were plentiful, people appeared to be much healthier overall.

Carl's observations and experiments led him to identify important but unknown compounds and he started to develop a multi-vitamin, multi-mineral dietary supplement using plants. Importantly, this supplement delivered not only conventional nutrients, but also phytonutrients.

This was the first supplement of its kind and it was soon followed by the birth of the Nutrilite brand. Today Nutrilite is the world's No.1 selling vitamins and dietary supplements brand.*

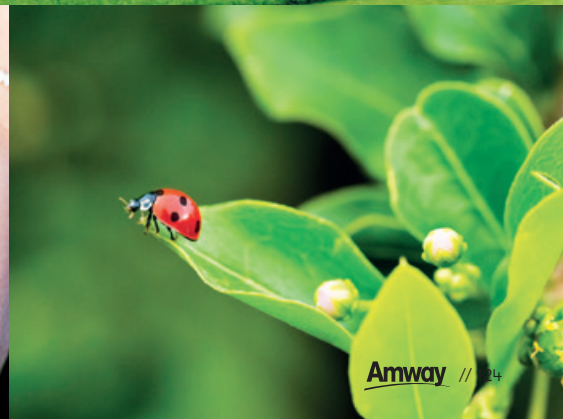

SUSTAINABLE FARMING FOR OVER 85 YEARS

From the beginning, Carl had a deep respect for nature. He was keen to learn from nature and insisted on using only nature to control nature.

More than 85 years later, we are still following Carl's idea of sustainable farming to grow the plants that are used in NUTRILITE products.

No synthetic pesticides, herbicides or fertilisers are used on Nutrilite farms.

ENRICH YOUR NATURAL POTENTIAL

The human body is an ecosystem that is constantly attempting to maintain inner balance to function optimally. To achieve this, proper nutrition is vital. A balanced and varied diet is key for both your mental and physical well-being today, as well as for your overall health for years to come. It is important to eat fruits and vegetables from all 5 colour groups, since plants not only contain different vitamins and minerals, but also secondary plant compounds known as phytonutrients. The World Health Organization (WHO) recommends consuming a minimum of 5 servings of fruit and vegetables daily. However, 3 out of 4 people worldwide do not meet this recommended dietary intake.*

YOUR HEALTHY ALTERNATIVE TO TRADITIONAL SOURCES OF PROTEIN

NUTRILITE™ All Plant Protein

NUTRILITE™ All Plant Protein contains a blend of soy, wheat and pea which is a source of nine essential amino acids.

- It is a source of protein for the maintenance of good health. It assists in building lean muscle when combined with regular training and a healthy balanced diet.
- NUTRILITE™ All Plant Protein contributes to protein synthesis which helps repair body tissues.
- Additionally, a varied and balanced diet and a healthy lifestyle are of general importance.

Item no. 110415 – 450 g

DID YOU KNOW

We offer you two specialised protein solutions. Choose the one that's right for you depending on your lifestyle:

/ NUTRILITE All Plant Protein: designed for everyone to build a solid foundation for everyday well-being.

/ XS Hydrolyzed Whey Protein: designed for sports enthusiasts to enhance lean muscle growth and support fast recovery after working out.

A SOLID FOUNDATION FOR EVERYDAY WELL-BEING.

Proteins are the body's frames for muscles and bones. A lot of people choose animal products as their main source of PROTEIN, but if processed meat is your main protein source, you may get unwanted cholesterol and fat, excess calories and salt along with it.

Vitamins and Supplements

In an ideal world, our regular diet would supply all the nutrients we need.

However, today's lifestyle often doesn't leave enough time for a truly nourishing diet, or we simply skip meals and replace fresh food with convenience products. Constraints on our time often lead to a diet that is poor in nutrients.

Health supplements are a good source of nutrients, which can help complement and supplement optimal nutrition, balanced diet and general well-being

That is why we developed NUTRILITE™ brand of vitamins, minerals and supplements.

VITAMIN C THAT IS RELEASED IN YOUR BODY FOR UP TO EIGHT HOURS!

NUTRILITE™ Vitamin C Plus (Extended Release)

NUTRILITE™ VITAMIN C PLUS contains Vitamin C from Ascorbic acid and Acerola as well as citrus bioflavonoids for immune support.

SUPPORT YOUR BONES

NUTRILITE™ Cal Mag D Plus

NUTRILITE™ Cal Mag D Plus contains calcium, magnesium, vitamin D - which contribute to the maintenance of normal bones. Regular exercise and a healthy diet with enough calcium and vitamin D help individuals maintain good bone health and may reduce the risk of osteoporosis.

Item no. 110606 – 180 tablets

PUT THE POWER OF THE SUN IN THE PALM OF YOUR HAND! SHINE FROM THE INSIDE OUT.

VITAMIN D

is essential to **our body** in many ways that **contribute to overall well-being**. It contributes to the maintenance of normal **bones, teeth** and **muscle function** and to the normal functioning of the **immune system**.

Our bodies can produce vitamin D on its own, but in order to do so our skin needs to be exposed to the sun. However, nowadays our lifestyles dictate that we spend much of our time working and living indoors and the opportunity to get enough sunlight are further limited during the autumn and winter months. Unfortunately, very few foods in nature contain vitamin D so getting it only from food is not an easy option. In short, we are not benefiting from the full potential of this 'sun vitamin'.

Vitamin D deficiency is now recognized as a pandemic with seasonal variations.

In the southern hemisphere, residents can make far less vitamin D from the sun during their winter months (June through August) than they can during their spring and summer (Solar-Facts-and-Advice).

Therefore, for individuals at risk for vitamin D insufficiency a balanced diet with adequate intake of food rich in vitamin D is the most appropriate way to maintain a good vitamin D level. If necessary, vitamin D supplements can be added irrespective of age, ethnicity, and latitude.***

PROTECT YOURSELF FROM VITAMIN D INADEQUACY

NUTRILITE Vitamin D

NUTRILITE™ Vitamin D contains Vitamin D which supports bone health and immune system. Vitamin D taken with Calcium combined with a healthy diet and regular exercise, may reduce the risk of developing osteoporosis. Additionally, a varied and balanced diet and a healthy lifestyle are of general importance.

Item no. 119797 – 90 tablets
