

A close-up photograph of a person's hands holding a metal colander filled with fresh green leafy vegetables, such as spinach, under a kitchen faucet. The faucet is equipped with a white eSpring water treatment system and a diverter. Water is flowing from the faucet into the colander, rinsing the vegetables. The background is a blurred kitchen setting with a window showing greenery outside.

## The New eSpring™ Water Treatment System with Faucet Diverter

**Clearly Better**

SKU 122940 New eSpring Water Treatment System with Faucet Diverter

eSpring™

“Water does more than sustain life. It can actually improve our health, fitness and even our appearance.”

**Dr. Sam Rehnborg**  
President, Nutrilite Health Institute

Water is essential for a healthy life.

That’s why families around the world seek a reliable source of purified, high-quality, great-tasting drinking water at home.

**Introducing the New eSpring Water Treatment System, from eSpring™** - the world’s number-one selling brand of home water treatment systems.\*

With its advanced technology and forward-thinking design, the New eSpring Water Treatment System can help you and your family get the **great-tasting drinking water** you need - right from your home faucet.\*\*

Discover how the  
New eSpring is **Clearly Better.**

\* Based on a Verify Markets study of 2021 global sales.

\*\* The eSpring Water Treatment System is designed only for use with potable water deemed safe to drink by local public health authorities.

## Leading the way to Clearly Better water

The New eSpring™ Water Treatment System\* uses innovative UV-C LED technology, along with our eSpring e3 Carbon Filter\*\*, to effectively reduce and destroy more contaminants and microorganisms in drinking water.†

Our team of engineers and scientists helped pioneer the use of UV-C LEDs in home water treatment systems.

You'll see and taste the difference with your very first sip!

\* eSpring Water Treatment System SKU 122940 and 122941.

\*\* eSpring e3 Carbon Filter SKU 122943Z.

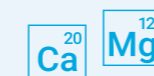

† The eSpring Water Treatment System is designed only for use with potable water deemed safe to drink by local public health authorities.

## eSpring e3 Carbon Filter

Filtration begins with effective reduction of 170+ contaminants including micro-plastics, PFOA and PFOS, chemicals, 1,2,3-TCP, and many more.

**Our 3 premium layers of water filtration include:**

- 1. Pre-filter**  
Traps larger particulate (sediment, scale precipitate, iron particles and dust)
- 2. Defense Guard**  
Improves water clarity and captures fine particles (micro-plastics, asbestos, silt and cysts)
- 3. Carbon Block**  
Effectively reduces chemicals, VOCs, pesticides, herbicides, PFOA and PFOS, and particulate down to 0.2 microns - 300-500x smaller than a human hair.

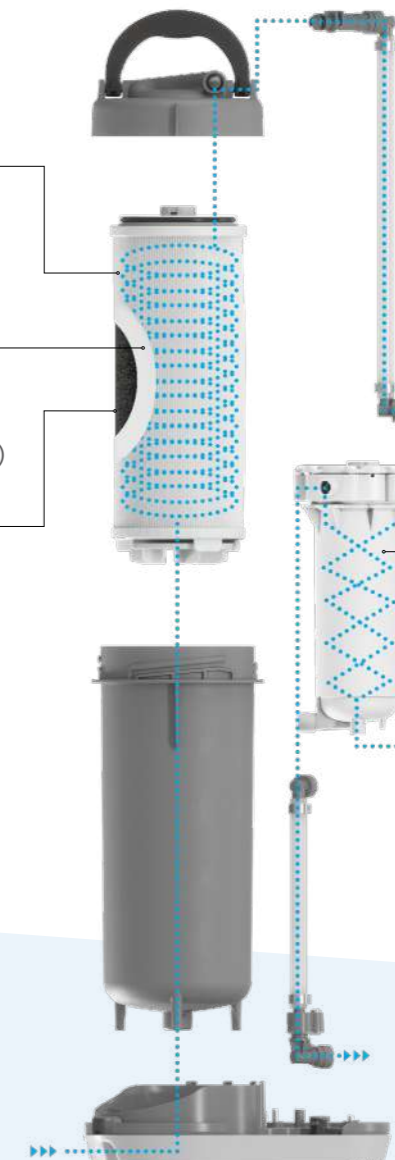

### Reducing the Bad, Keeping the Good

The New eSpring retains important beneficial minerals that may be in your water, including calcium and magnesium.

### Innovation and Leadership

Amway has additional 42 patents granted or pending globally for the New eSpring Water Treatment System.

Discover our new pathway to cleaner, better-tasting water!

## UV-C LED Technology

Next, water moves through the UV-C LED chamber.

UV-C LEDs emit high-energy ultraviolet light in the average 267 nanometer wavelength range, which is very effective at killing microorganisms such as bacteria, viruses, and cysts that may be present in water.

### UV-C LEDs:

- Are a chemical-free, sustainable way to disinfect water.
- Use no harmful byproducts, and do not affect water taste and odor.
- On-demand technology, for immediate filtration as soon as water starts flowing.

### Effectively destroys up to:

- 99.9999% of bacteria
- 99.99% of viruses
- 99.9% of waterborne cysts

## International Certifications

Amway is the **first company** to have a water treatment system with **UV-C LED technology certified by NSF** to NSF/ANSI Standard 55 for Class B microbial reduction.

Amway earned the **Water Quality Association Gold Seal** for superb consumer water treatment products.

Built-in Sustainability and Performance

In developing the New eSpring™ Water Treatment System, our goal was to create a water treatment system that was good for you, and good for the world.

eSpring engineers looked at the unit, inside and out – searching for new ways to incorporate sustainable design and natural solutions that were also effective and long-lasting.

Plant-based Performance

The core of our eSpring e3 Carbon Filter uses high-quality, **coconut-shell-based activated carbon** to effectively reduce contaminants.\*

No UV Lamp Waste

In redesigning the New eSpring we improved filtration by separating the e3 Carbon Filter from the UV-C LEDs. This new system is more sustainable as well, because UV-C LEDs are **designed to last up to 10 years** – eliminating annual disposal a UV lamp.

Less Energy Usage

The New eSpring **uses 25% less energy** when actively in use compared to our previous model.

Attractive, Less Intrusive Display

The display panel on the New eSpring is designed to go into **energy-saving, “lights-off” mode** when water is not flowing.

\* The eSpring Water Treatment System is designed only for use with potable water deemed safe to drink by local public health authorities.

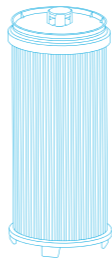

Just one plastic water bottle can take up to 450 years to degrade.\*

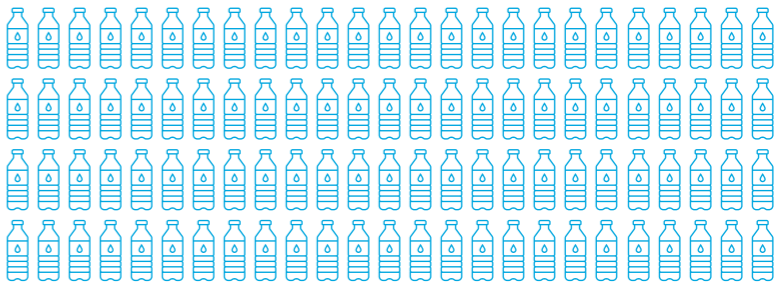

Refill your own reusable bottle instead, with pure, great-tasting water from your New eSpring™ Water Treatment System, and make a sustainable difference in the world!

Every year, one eSpring e3 Carbon Filter treats up to 5,000L of water\*\*...

...the equivalent of up to 10,000 500mL single-use, plastic water bottles that might otherwise be discarded!

=

🍷 = 100 (500mL) plastic water bottles

\* Information based on a Verify Markets study in 2022.  
\*\* Based on average annual water usage for a family of six. Actual filter life depends on water quality and usage.

# The New eSpring™: Convenience, Beauty and Versatility

The New eSpring Water Treatment System blends in with any kitchen décor, in every style home. With faster filter changes, an improved tube management system, and a modern, understated display panel, the New eSpring is a triumph of design and performance.

## Touch-free Display Lights Up Only When in Use

Featuring three simple icons, the display panel on the New eSpring is designed to be less intrusive than our previous model.

As water flows and is purified through the unit, all lights will illuminate, showing the status of the e3 Carbon Filter, UV-C LEDs and Connectivity (shown right).

When the unit is not actively in use, the display lights are off, in energy-saving “idle” mode.

### e3 Carbon Filter

- Blue – Full filter life
- Yellow – Low filter life
- Red – Replace filter

### UV UV-C LED

- Blue – Full UV-C LED life
- Yellow – Low UV-C LED life
- Red – Replace UV-C LED\*

### Connectivity\*\*

- Blinking White – Finding Bluetooth®
- Solid White – Bluetooth connected
- Blinking Blue – Connecting Wi-Fi®
- Solid Blue – Wi-Fi connected

\* Service provider required for replacement  
\*\* Internet service required

With the New eSpring™, filter changes are easy as **2-1-0**

With our new design, you can change the filter in less than two minutes (compared to the 15 minute process of our previous model).

- 2 minute filter change
- 1 time per year
- 0 tools needed

## eSpring Faucet Diverter: Easy to install, dispense and enjoy.

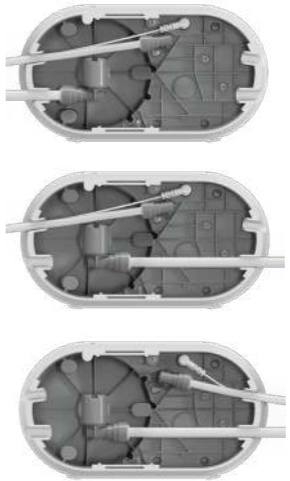

### New eSpring Water Treatment System with Auxiliary Faucet SKU 122941

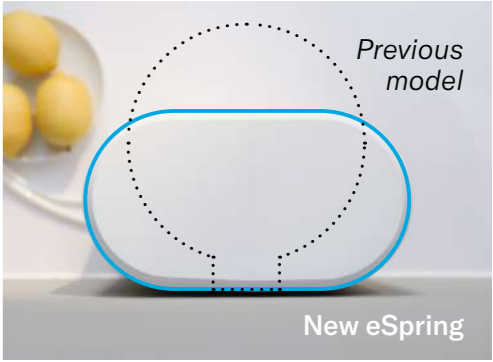

The eSpring Faucet Diverter comes with the above-the-counter unit installation, and instantly transforms tap water into clean, great-tasting water. With three dispense modes, you can easily switch between purified water, and untreated stream or spray.

## Redesigned Tubing for Compact Installation

The improved tube management system lets you position the unit directly against the wall, for a space-saving, streamlined appearance.

Bottom of unit:  
Tubing can be installed multiple ways to maximize your installation options.

16% smaller footprint compared to our previous model.

## Stay Connected with All Your Amway Home Devices

### Amway™ Healthy Home app

The new Amway Healthy Home app\* lets you monitor your New eSpring™ Water Treatment System - at home or away:

- Get filter-change alerts
- Order filters directly from the app
- Monitor water and air usage
- Get automated software updates
- Find product information and how-to videos
- Activate your Amway device warranty

Wherever you go, use the Amway Healthy Home app to keep the air and water in your home safe and clean.

\* Internet connection required

Monitor water usage at a glance.

Order a new filter with just one click.
