

Immune Support

Another “plus” that comes with vitamin C

NUTRILITE™ Vitamin C Plus Extended Release is one way to support your natural defenses, all day long.

An active lifestyle that offers plenty of exposure to people, places and things also offers plenty of exposure to germs that can weaken your immune system. Busy people who are always on the go should consider the immune-supporting properties of a vitamin C supplement.

White blood cells (leukocytes) contain higher concentrations of vitamin C than other cells and it's their job to fight off infection, disease and illness. It's important for these cells not to be deficient in vitamin C. So, it makes sense that we would want to maintain a reliable supply of vitamin C throughout our day to promote a strong immune system.

Vitamin C Plus *Extended Release* is ideal to balance the health effects of hectic travel and activity. Extended release means the tablet is specially designed to provide slow, steady nutrient release over an 8-hour period. This slow release improves the total utilization of vitamin C in the body and avoids the waste often associated with large doses of instant release vitamin C.

Replenish Daily

Vitamin C is a water-soluble nutrient. That means it completely dissolves in water and cannot be stored in the body for very long. Whatever is not readily absorbed is excreted.

It is essential that vitamin C is replenished in our bodies every single day. Individuals who aren't regularly eating C-rich foods can benefit from Vitamin C Plus *Extended Release* dietary supplement.

Now More Convenient Than Ever

It's simple to make the new Vitamin C Plus *Extended Release* part of your daily routine. You can take it whenever you like, day or night. No more remembering to take a tablet every few hours and no worries about finding something to eat with it. That's a lot of flexibility. And the new, slim shape tablet makes it easy to swallow.

You would have to eat more than seven oranges to get the amount of vitamin C packed into just one Vitamin C Plus *Extended Release* tablet.

When you add it all up, new Vitamin C Plus *Extended Release* is a better way to get the most out of your vitamin C... all day long.

Slow, steady release for 8 hours

A better way to get the most out of your vitamin C ...all day long.
