

A stronger you, today and beyond*

XS

Maintain and grow your muscles
and support body essential functions with

XS™ Amino Fuel

Why Amino acids are Important in our daily life:

- We start losing muscles in our mid 30s.
- By the time we reached 70s we lost around 25% of the muscle.
- Muscle help us to live the life to the fullest. Low muscle mass in our later year may lead to frailty and loss in independent living. Essential amino acids must be supplied daily to maintain normal body functions.
